

FOOD PROCESSING SOFTWARE

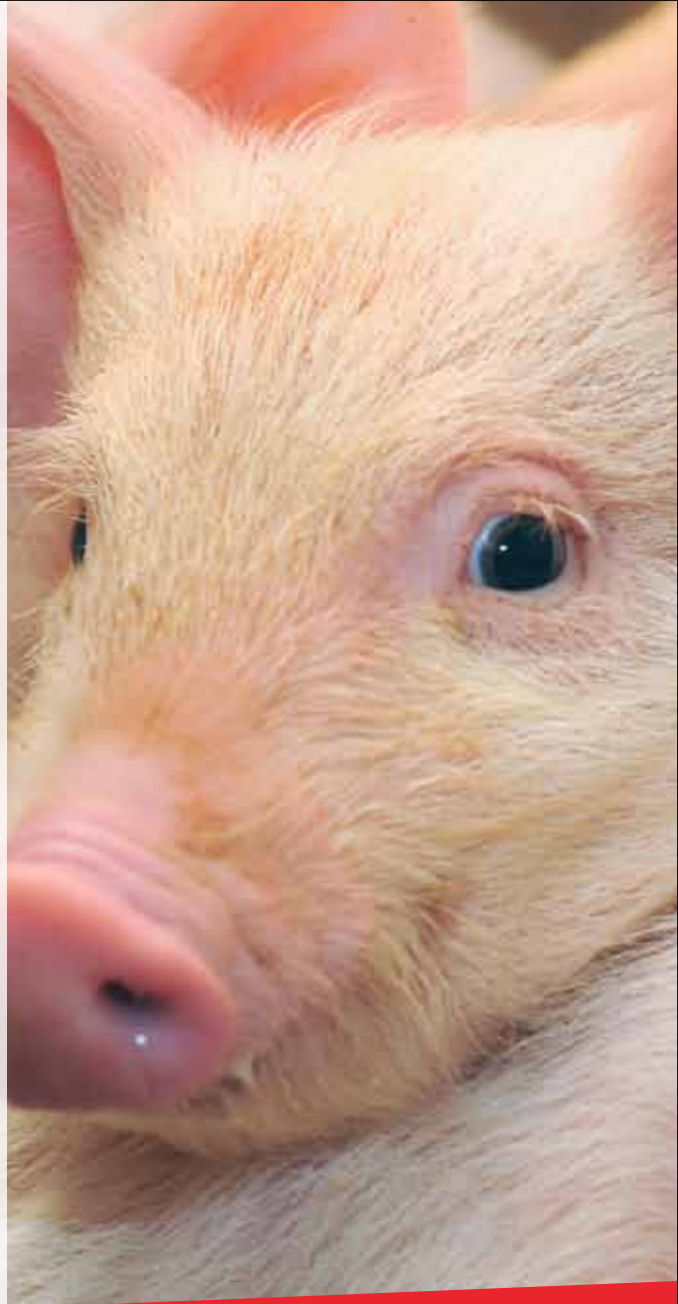

Pork Processing

Emydex offer a complete solution for all sectors of the Pork processing industry, including abattoir, cutting plant, curing plant or retail packing plant. The system offers online animal movement transfer with the relevant Government departments, high speed weighing and electronic grading, country of origin labelling, and 3rd party cold store integration with box level traceability.

Operating in over 20 Pork processing plants, Emydex are the market leading supplier of factory floor software systems to Pigmear processors in Ireland. Designed to cater for both single plant and multi plant operations, our Pigmear customers include the Top 4 primal Pork processors, that between them account for 93% of all Pork primal processing in Ireland.

"Emydex have provided us with a software solution that is easy to use, flexible and which can be tailored to meet all our current and future requirements. The flexible reporting and yielding functionalities have given us greater control over business processes and productivity. We are constantly expanding our Emydex system to include more and more business processes with effective solutions provided by Emydex"

Alan Doocey - IT Manager - Dawn Pork & Bacon

Pork processing system features include:

- ▶ Kill Plan & Appointments (eProcurement)
- ▶ Security Hut Inspections – Animal & Transport

FACTORY FLOOR SOFTWARE FOR FOOD PROCESSORS

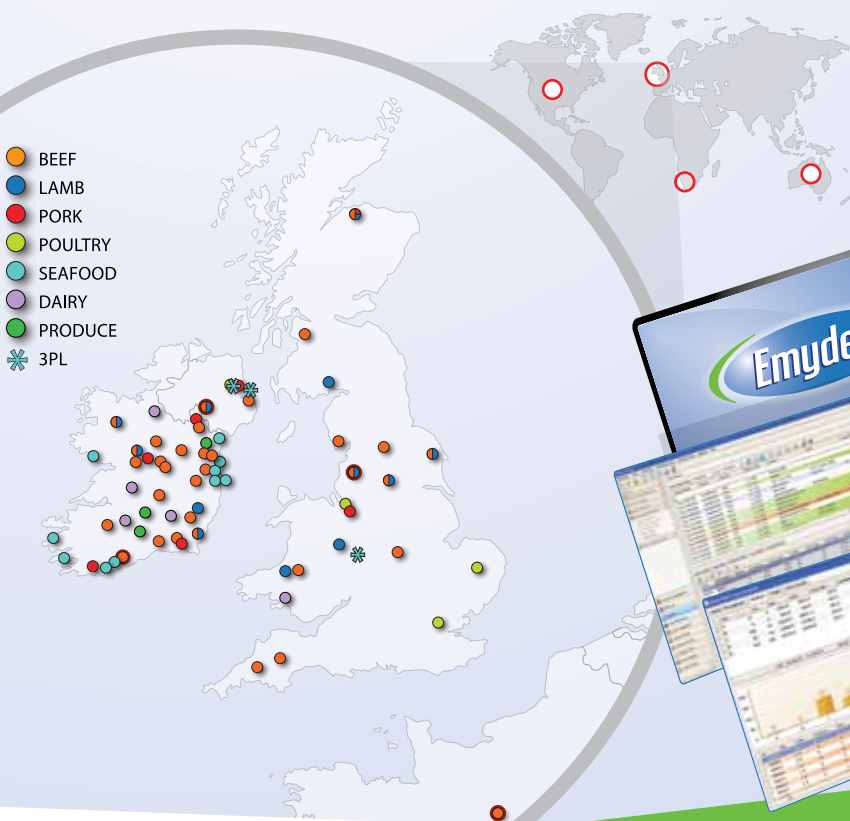

Customisable Food Processing Software Solutions

Emydex specialise in the design, development and implementation of factory floor software systems for the Food Industry.

Using our software, food processors can monitor, control and report on all stages of their production processes, gaining full traceability of food produced from door to door.

Emydex software is modular in design so food processors large and small have the option to roll-out our modules on a piecemeal basis meaning less risk, time and cost.

Global Customer Network

How we differ from other software providers:

Hardware Flexibility

Emydex software will run on any compatible hardware device offering customers the flexibility to reuse existing hardware or shop around for the best options.

Software Flexibility

Our open technology platform allows ease of integration to any 3rd party or in-house software systems such as financials, ERP or 3rd party cold stores.

Flexibility to Customise

Emydex software can be customised to suit any existing work practices so customers never have to change their existing business processes to suit the system.
